Notice of New Restrictions on the Sale and Use of Pesticide Products Containing Carbaryl

Effective **August 1, 2020**, the California Department of Pesticide Regulation (DPR) will implement a new regulation that is expected to impact entities who sell, purchase, and use non-agricultural products containing the pesticide active ingredient carbaryl. Currently, only carbaryl products labeled for agricultural use, with the exception of agricultural baits, are designated as California restricted materials. The new regulation will expand the California restricted materials designation to include all pesticide products containing carbaryl, including those labeled for home and institutional use, but will continue to exclude baits labeled only for agricultural use (<https://www.cdpr.ca.gov/docs/legbills/rulepkgs/19-003/19-003.htm>); see a list of included and excluded products on page 2).

On August 1, 2020, the following will apply to all pesticide products containing carbaryl, with the exception of baits labeled only for agricultural use:

- Pesticide registrants can only sell California restricted materials into or within California to other registrants, licensed pesticide brokers, or licensed pest control dealers
 - Only licensed pest control dealers can sell California restricted materials directly to an end-user
 - All end-users possessing or using a California restricted material must be a certified commercial or private applicator, or work under their direct supervision, with a permit issued by the county agricultural commissioner
- For questions regarding private applicator certification or obtaining a restricted materials permit, please contact your local county agricultural commissioner.
- For questions on becoming a certified applicator, licensed dealer, or licensed broker, please contact DPR's Pest Management and Licensing Branch at (916) 445-4038.
- For questions regarding sales of unregistered or misbranded carbaryl products, please contact DPR's Enforcement Branch, Product Compliance Unit at (916) 324-4100.
- For questions regarding registration of carbaryl products, please contact Ms. Kara James at (916) 324-3523.
